***Stories on the natural habitats and sea critters of the marine reserve.**

Coverage includes:

Seaweed, Jellyfish, Sea horses, Mussels, absence of, Sea stars, Nudibranchs, Spotty, Blue Cod, Fish in general, General habitat, Rock Pools, Spillover

Stories in Newsletters or special articles will be written or commissioned to cover the natural environment, the groups of marine biota and their interactions, as a resource for

understanding, study and awareness of the special marine environments of the South Coast and the Taputeranga Marine Reserve. These articles provide interpretation resources for the **Island Bay Snorkel Trail**.
